AMENDMENTS TO THE CLAIMS

1. (currently amended) A method of using a print device, comprising the steps of:
carrying out a specified task at a print device;
determining, by the print device, whether the specified task was carried out
successfully by the print device; and
generating an email confirmation, automatically by the print device, including an
indication of success or failure of said carried out task at said print device;
wherein said step of carrying out a specified task includes rendering image data
at said print device; and
wherein said email confirmation includes a thumbnail image associated with said
rendered image data upon a successful rendering of said image data, and said email
confirmation does not include a thumbnail image associated with said rendered image
data upon an unsuccessful rendering of said image data.
2. (canceled)
3. (currently amended) The method of claim 2 1, wherein said rendered image data
corresponds to one of a scan to network job and a fax job.
4. (original) The method of claim 1, wherein said email confirmation relates to a
scan to network job.
5. (original) The method of claim 4, wherein said email confirmation includes upon
said failure at least one of a primary SMTP gateway IP address; a connection failure,
and number of connection tries; and a mail server response.
6. (original) The method of claim 1, wherein said email confirmation relates to a fax
job.

Amendment
Serial No. 10/764,163
Docket No. 2003-0667.02

7. (original) The method of claim 6, wherein said email confirmation includes upon said failure at least one of a connection failure, and number of connection tries; date; station name; and station number.

8. (canceled)

9. (currently amended) The method of claim 2 1, wherein said email confirmation includes an attachment.

10. (original) The method of claim 9, wherein said email confirmation includes a thumbnail image of said attachment.

11. (original) The method of claim 9, wherein said email confirmation includes a thumbnail image of said attachment upon a successful rendering of said image data, and said email confirmation does not include a thumbnail image of said attachment upon an unsuccessful rendering of said image data.

12. (original) The method of claim 9, wherein said email confirmation comprises information relating to said attachment, including at least one of a file name, data format, and rendered image resolution.

13. (original) The method of claim 1, wherein said generating step includes the substep of transmitting said email confirmation over a network.

14. (original) The method of claim 13, wherein said transmitting step includes transmitting said email confirmation over a network using one of said print device and a computer attached to said network.

Amendment
Serial No. 10/764,163
Docket No. 2003-0667.02

15. (original) The method of claim, 1 wherein said print device is part of a multi-function machine.
16. (original) A method of using a print device, comprising the steps of:
carrying out a specified task at a print device; and
generating an email confirmation including an indication of success or failure of said carried out task at said print device, said email confirmation including a thumbnail image associated with said specified task upon successfully carrying out said specified task, and said email confirmation not including a thumbnail image associated with said specified task upon unsuccessfully carrying out said specified task.
17. (original) The method of claim 16, wherein said step of carrying out a specified task includes rendering image data at said print device.
18. (original) The method of claim 17, wherein said rendered image data corresponds to one of a scan to network job and a fax job.
19. (original) The method of claim 17, wherein said email confirmation includes a thumbnail image associated with said rendered image data upon a successful rendering of said image data, and said email confirmation does not include a thumbnail image associated with said rendered image data upon an unsuccessful rendering of said image data.
20. (original) The method of claim 16, wherein said email confirmation includes an attachment.
21. (original) The method of claim 16, wherein said generating step includes the substep of transmitting said email confirmation over a network.

Amendment

Serial No. 10/764,163

Docket No. 2003-0667.02

22. (original) The method of claim 21, wherein said transmitting step includes transmitting said email confirmation over a network using one of said print device and a computer attached to said network.

23. (original) The method of claim, 16 wherein said print device is part of a multi-function machine.

24. (currently amended) A method of using a print device, comprising the steps of:
carrying out a specified task at a print device;

determining, by the print device, whether the specified task was carried out successfully by the print device; and

generating an email confirmation at by said print device, said email confirmation including information pertaining to said specified task;

wherein said email confirmation includes a thumbnail image associated with the specified task.

25. (original) The method of claim 24, wherein said email confirmation includes an indication of success or failure of said specified task.

26. (original) The method of claim 24, wherein said step of carrying out a specified task includes rendering image data at said print device.

27. (original) The method of claim 26, wherein said rendered image data corresponds to one of a scan to network job and a fax job.

28. (canceled)

29. (original) The method of claim 24, wherein said automatically generating step includes the substep of transmitting said email confirmation over a network.

Amendment

Serial No. 10/764,163

Docket No. 2003-0687.02

30. (original) The method of claim 29, wherein said transmitting step includes transmitting said email confirmation over a network using one of said print device and a computer attached to said network.

31. (original) The method of claim, 24 wherein said print device is part of a multifunction machine.

32. (canceled)

33. (canceled)

34. (new) A method of using a print device, comprising the steps of:
carrying out a specified task at a print device;
determining, by the print device, whether the specified task was carried out successfully by the print device; and
generating an email confirmation, automatically by the print device, including an indication of success or failure of said carried out task at said print device;
wherein said email confirmation relates to a scan to network job.

35. (new) The method of claim 34, wherein said email confirmation includes upon said failure at least one of a primary SMTP gateway IP address; a connection failure, and number of connection tries; and a mail server response.
